

Redis Cloud

Fully Managed Redis - Real-Time Data Platform

Redis Ltd. Service Proposal

1. Scaling (Vertical / Horizontal / Auto)

Linear horizontal scaling. Auto-tiering (RAM + Flash). Active-Active for multi-region writes.

2. Backup, Recovery & Disaster Recovery

Automated persistence (AOF/RDB). Point-in-time backups. Cross-region replication.

Replication and failover capabilities as described in HA section. Service credits available for SLA breaches per policy.

3. Pricing Model & Additional Fees

Fixed plans + flexible (pay for throughput/memory). Annual commits for discounts. Free tier available.

Additional / Hidden Fees: Network egress, backup storage beyond included, snapshot storage, premium support, data transfer between regions/clouds, CMEK/KMS usage.

Reserved / Committed Discounts: Annual and multi-year commits. Enterprise volume pricing. Contact Redis sales.

4. Observability, Monitoring & Slow Query Analysis

RedisInsight, Cloud metrics, Prometheus, Datadog, slowlog, latency monitoring.

Most platforms provide slow-query logs, explain plans, and recommendation engines.

5. Support Tiers & Response Times

Standard, Premium, Enterprise. 24/7 for higher tiers. Severity response SLAs.

6. Data Migration & Tooling

RedisShake, RIOT, native replication, partner tools, zero-downtime import.

7. Network, VPC/Private Access & Peering

Private connectivity, VPC peering alternatives via PrivateLink. Egress fees.

8. Data Center / Region Locations

AWS, GCP, Azure regions worldwide including Mumbai, Singapore, Tokyo, Frankfurt, Virginia, Oregon, London, Sydney.

9. Vendor Lock-in & Portability

Where standard engines (Postgres, MySQL, Redis protocols) are used, portability is high via dump/restore or logical replication.

Proprietary extensions or distributed SQL semantics may require more effort. Open standards and export tools mitigate lock-in.

10. Managed Service Limitations

Primarily in-memory (with auto-tiering); data model is key-value / data structures not relational; cost scales with memory.

11. Maintenance & Backup Windows

Customer-configurable or provider-managed low-impact maintenance. Backup windows typically continuous or daily with minimal performance impact.

12. Supported Engines & Technology Stack

Redis, Redis Stack (Search, JSON, TimeSeries, Graph, Bloom)
Compatible with standard drivers, ORMs, and tooling for the listed engines.

13. SLA, Uptime & High Availability

SLA: 99.999% for multi-AZ Active-Active; 99.99% standard multi-AZ.

Architecture: Multi-AZ replication. Automatic failover. Active-Active for active multi-region.

RPO/RTO: RPO 0 for local; configurable for Active-Active. RTO seconds.

Multi-region and clustering options available where noted.

14. Encryption, Security & Compliance

Encryption: Encryption at rest and in transit. Customer-managed keys. TLS/mTLS.

Certifications: SOC 2, ISO 27001, PCI DSS, HIPAA, FedRAMP, GDPR

IAM: Role-based access, Redis ACLs, SSO, PrivateLink / Private Service Connect, IP allowlists.

Audit logging and customer-managed keys supported on applicable tiers.

15. Performance Characteristics

Sub-millisecond latency. Linear scaling. Active-Active geo-distribution with conflict-free CRDTs.

This proposal from Redis Ltd. is provided for evaluation purposes. Binding terms appear in the definitive agreement and order form. Contact your account representative for customized quotations and proof-of-concept support.
