

Google Cloud SQL & AlloyDB

Managed PostgreSQL, MySQL, SQL Server + High-Performance AlloyDB

Google Cloud | Capability & Commercial Proposal

Supported Engines

PostgreSQL, MySQL, SQL Server, AlloyDB for PostgreSQL

SLA

Cloud SQL Enterprise Plus: 99.99%; Enterprise: 99.95%.
AlloyDB HA: 99.99% (most regions).

Key Differentiator

AlloyDB columnar engine + adaptive optimization for HTAP workloads.

Security & Encryption

Google default encryption at rest + CMEK (Cloud KMS). TLS in transit. AlloyDB supports customer-managed keys.

Certifications: SOC 1/2/3, ISO 27001/27017/27018, PCI DSS, HIPAA, FedRAMP High, CSA STAR

IAM: Cloud IAM, IAM database authentication, VPC Service Controls, Private Service Connect.

Audit: Cloud Audit Logs + Database Audit Logging available.

Performance, Scaling & HA

Perf: AlloyDB: up to 4x faster transactional, 100x analytical vs standard PostgreSQL. Columnar engine. Adaptive optimization.

Scale: Vertical scaling of vCPU/memory. Read replicas. AlloyDB read pools. Storage auto-grows. Serverless options limited.

HA: Regional HA with automatic failover across zones. AlloyDB primary + standby in different zones.

RPO/RTO: RPO near-zero with HA; RTO seconds. Cross-region for DR.

Replicas: Read pools and cross-region supported.

Backup, DR & Resilience

Automated daily backups + on-demand. PITR. Retention configurable. Cross-region backup copy.

Cross-region DR configurations available. Maintenance windows customer-controlled with low-impact options.

Pricing & Commercial

Per vCPU/hour + memory + storage. Committed Use Discounts 25% (1yr) / 52% (3yr) for AlloyDB. Sustained use discounts.

Fees: Storage, backup storage, network egress, CMEK charges.

Discounts: Committed use discounts + sustained use. Enterprise agreements available. Contact sales for volume pricing.

Credits: SLA credits per published terms.

Observability & Support

Cloud Monitoring, Query Insights, Cloud Logging, Database Center recommendations, slow query analysis.

Slow-query recommendations via Query Insights.

Support: Basic, Standard, Enhanced, Premium. 24/7 for paid tiers. Response <1h for critical on Premium.

Network, Migration & Locations

Network: Private IP, Private Service Connect, VPC peering, Cloud Interconnect. Egress fees apply.

Migration: Database Migration Service (DMS), Strim, native tools, Database Migration Assessment.

Regions: Global including Mumbai, Delhi, Singapore, Tokyo, Seoul, Sydney, London, Frankfurt, Belgium, Iowa, Oregon, South Carolina, Sao Paulo.

Portability: Standard Postgres/MySQL protocols; AlloyDB is Postgres wire-compatible.

Limitations: AlloyDB is PostgresSQL-only; some extensions restricted; maintenance windows.

Google Cloud terms of service and specific SKU pricing apply. This proposal is indicative.
