

Oracle Autonomous Database

Self-Driving, Self-Securing, Self-Repairing Database

Oracle Corporation Service Proposal

1. Supported Engines & Technology Stack

Oracle Autonomous Transaction Processing (ATP), Autonomous Data Warehouse (ADW), JSON, Graph, Spatial
Compatible with standard drivers, ORMs, and tooling for the listed engines.

2. SLA, Uptime & High Availability

SLA: 99.95% without Data Guard; 99.995% with Autonomous Data Guard.

Architecture: Built-in MAA. Autonomous Data Guard for multi-AD/region. Automatic failover in single-digit seconds.

RPO/RTO: RPO zero with Data Guard sync; RTO single-digit seconds.

Multi-region and clustering options available where noted.

3. Encryption, Security & Compliance

Encryption: Always-on AES-256 at rest. Oracle-managed or customer-managed keys. TLS 1.2+/mTLS in transit. TDE included.

Certifications: SOC 1/2, ISO 27001, PCI DSS, HIPAA, FedRAMP, CSA STAR, GDPR

IAM: OCI IAM, Database Vault, Data Safe, network ACLs, private endpoints, VCN isolation.

Audit logging and customer-managed keys supported on applicable tiers.

4. Performance Characteristics

Exadata infrastructure. Auto-indexing, auto-tuning. Elastic scaling of ECPUs and storage independently. Up to millions TPS.

5. Scaling (Vertical / Horizontal / Auto)

Online elastic scale of compute (ECPU) and storage independently. Auto-scaling options. Serverless model available.

6. Backup, Recovery & Disaster Recovery

Automatic daily backups + PITR. Retention up to 60 days. Cross-region Autonomous Data Guard for DR.

Replication and failover capabilities as described in HA section. Service credits available for SLA breaches per policy.

7. Pricing Model & Additional Fees

ECPU per hour + storage TB/month. BYOL discounts. Elastic pools for consolidation savings up to 87%.

Additional / Hidden Fees: Network egress, backup storage beyond included, snapshot storage, premium support, data transfer between regions/clouds, CMEK/KMS usage.

Reserved / Committed Discounts: BYOL + Universal Credits + Enterprise Discount Programs. Contact Oracle sales.

8. Observability, Monitoring & Slow Query Analysis

Performance Hub, Automatic Workload Repository, OEM integration, Cloud Guard, Logging.

Most platforms provide slow-query logs, explain plans, and recommendation engines.

9. Support Tiers & Response Times

Premier Support included. 24/7. Severity 1 response within 15-30 min typically.

10. Data Migration & Tooling

Zero Downtime Migration (ZDM), GoldenGate, Data Pump, DMS equivalents, Cloud Lift Services.

11. Network, VPC/Private Access & Peering

Private endpoints, VCN peering, FastConnect. Egress charges apply.

12. Data Center / Region Locations

OCI regions worldwide incl. Mumbai, Hyderabad, Tokyo, Seoul, Sydney, Frankfurt, London, Ashburn, Phoenix, Sao Paulo.

13. Vendor Lock-in & Portability

Where standard engines (Postgres, MySQL, Redis protocols) are used, portability is high via dump/restore or logical replication. Proprietary extensions or distributed SQL semantics may require more effort. Open standards and export tools mitigate lock-in.

14. Managed Service Limitations

Oracle engine only (with multi-model); some admin privileges restricted in Autonomous; patching controlled by Oracle.

15. Maintenance & Backup Windows

Customer-configurable or provider-managed low-impact maintenance. Backup windows typically continuous or daily with minimal performance impact.
